

Wema is the world wide leading supplier of level sensor and suction solutions for fuel and AdBlue to truck, buses, agriculture, construction and marine industries. AdBlue is used in selective catalytic reduction (SCR) systems for diesel engines to reduce emission gases in particular NOx. We also provide instrumentation to the marine industry. In 2007 we won NHO's innovation prize.

At our headquarters in Bergen we have 70 employees focused on sales, marketing (product management, technical support and product quality), R&D, quality, supply chain, business administration and the global management supporting our customers around the world and regional companies in India, North America (USA) and soon to come North East Asia (China)

Due to growth and global expansion of our business we are looking for new resources

Product Manager

Requirement education / experience:

Mechanical engineer (BSc or MSc), minimum 3 years work experience or top talent
Business education such as MBA is an advantage but not a must
Product management and/or project management experience
